

PUBCO HYDRAULICALLY OPERATED DUAL FLUSH VALVE

Spare Parts

The Pubco dual flush valve utilises the same Model B washer kit for the Inner valve as the standard single flush valve and the Adjusting valve is identical. The Auxiliary valve for the hydraulically operated valve is slightly different and uses a stainless steel pin rather than a brass sleeve. This pin should not require replacement.

HYDRAULIC ACTUATORS

Half Flush Diaphragm Actuator

Full Flush Piston Actuator

HYDRAULIC PUSH BUTTONS

The push button cartridge is the same for both the full and half flush buttons.

The unit can be purchased new or serviced at our premises.

Wall assembly parts are available to suit the kind of wall or panel

Standard wall flanges and buttons for the half and full flush are available.

All miscellaneous fittings and tubing are available.
